Work Experience

ReactJs NextJs Developer , <i>Artoon solutions</i> 	08/2024 – Present Surat, India
MERN Stack Developer , <i>Highcodesolutions</i>	01/2024 – 07/2024 Surat, India
NodeJs Developer , <i>Oengines Games LLP</i> 	08/2022 – 12/2023 Surat, India

Education

B.Com , <i>VNSGU</i> (Veer Narmad South Gujarat University)	2019 – 2022 Surat, India
---	----------------------------

Skills

• React.Js	• React Query(Tan-Stack)	• Javascript
• Bootstrap CSS	• Github	• Firebase Database
• Next..Js	• NextAuth	• TypeScript
• Tailwind CSS	• MUI/Shadcn UI	• AWS amplify
• Vercel Deployment	• Redux-Toolkit	• HTML
• Git/Github/GiLab	• NodeJs	• NestJs
• Socket.IO	• MySQL/PostgreSQL	• MongoDB
• Express Js	• PWA app	• Prompt Engineering
• GitHub Copilot	• AI-Assisted Application Development	• Payment Gateway(razorpay, stripe, fastspring)

Projects

- DM Commerce**, (*Tech Stack: React.js, Vite PWA, Firebase, Captcha, Fastspring payment gateway*)
- Built a **mobile-first Progressive Web App (PWA)** for solo entrepreneurs and small service businesses to manage bookings, appointments, and subscriptions from a unified dashboard.
 - Developed the complete **booking workflow**, including request approval/rejection, a public client booking page, and an appointment lifecycle with **9 status states**.
 - Integrated **FastSpring** for subscription billing, including free-trial management and usage-limit enforcement.

- Implemented **Firestore Cloud Messaging (FCM)** push notifications with offline support using service workers.
- Managed application state using **Redux Toolkit** and **React Query** for efficient state management, caching, and server synchronization.
- Built secure authentication using **JWT** with automatic token refresh for seamless user sessions.
- Developed a responsive, accessible UI using Tailwind CSS, shadcn/ui, and Radix UI, delivering a PWA-certified user experience across devices.

Artoon Solution Portfolio, *(Tech Stack: Next.js, React.js, Sass, React query)*

- Professional company portfolio website designed to showcase our services, hiring, case studies, blogs, glossary, free consultation, and cost calculator, along with an administration portal for managing blogs, services, glossary, web stories, and cost calculators.

Utara Management System (UMS), *(Tech Stack: React.js, TypeScript, Redux-toolkit, RBAC)*

- Implemented a secure role-based access control (RBAC) system with **7 user roles**, including **Super Admin, Front Desk, Location Admin**, and other operational roles.
- Built modules for booking management, guest check-in/check-out, room allocation, user management, location management, reports, and dashboard analytics
- Created dashboards with role-specific permissions to ensure secure and efficient operations.
- Used AI-assisted development tools to accelerate UI development, component implementation, and debugging while validating functionality and ensuring code quality.

Mybrary, *(Tech Stack: Next.js, Tailwind css, ShadcnUI, React query, Redux-toolkit)*

- Social platform for book lovers, built with Next.js and Tailwind CSS for fast, responsive performance.
- Users can explore book showcase with covers, detailed insights, and interactive reactions, while seamlessly engaging through integrated social feeds and follower tracking.
- The platform combines personal library management with community-driven discovery, creating a connected and engaging reading experience

Easysell-(CMS) , *(Tech Stack: React.js, Tailwind css, shadcnUI, React query-(Tan-Stack))*

- Integrated **AWS Seller Central APIs** with AI-generated fields for automated seller data management.
- Implemented **Super Admin panel, role-based routes, and module access control** for secure multi-user operations.
- Designed **seller assignment logic** to restrict user access only to their assigned sellers, improving security and workflow efficiency.
- Developed a **Content Manager module** (similar to Amazon A+ Content) supporting detailed product listings with large, dynamic schemas.

Resume Analyser- AI-Driven Hiring Platform ,

(Tech Stack: React.js, Ant Design, Tailwind CSS, Razorpay)

- Developed a **responsive frontend interface** for uploading job descriptions and up to 20 resumes simultaneously.
- Implemented **candidate comparison dashboards** with table views for skills, education, and experience using Ant Design and Tailwind CSS.
- Integrated **Razorpay payment gateway** for secure subscription and transaction management.

- Optimized UI for **data-driven insights** to help HR teams make faster and more accurate hiring decisions

Dealorchestra-India's Trusted Coupons, Offers & Cashback Website [🔗](#),

(Tech Stack: Next.js, tailwind css, redux-toolkit)

- Built a **responsive frontend interface** for browsing trending coupons, promo codes, and discount categories.
- Integrated **promo code application logic** to help users save money on leading e-commerce platforms.
- Developed **SEO-friendly pages** to improve search visibility and user engagement.
- Ensured **cross-browser compatibility and performance optimization** for a seamless shopping experience.

Dvividconsultant- foreign educational site (IELTS, PTE) [🔗](#),

(Tech Stack: Next.js, MUI, Node.js, Express.js, MySQL)

- In this project, I developed a comprehensive educational website where the entire content is managed by an admin.
- Admins can add and manage all pages, facilitating students to easily apply for foreign education programs. Additionally, I integrated Builder.io [🔗](#), Joho connection, Google Analytics and added Tawk.to [🔗](#) for live chat.

Travela- traveling site [🔗](#), (Tech Stack: Node.js, Express.js, MongoDB)

- Developed and optimized **secure authentication system** with JWT and bcrypt.
- Designed and implemented **RESTful APIs** for user management, bookings, and payments.
- Built **scalable MongoDB schemas** with Mongoose for efficient data handling.
- Improved **API performance** through query optimization and error handling.

PoolGame- 8 Ball Pool Game [🔗](#), (Tech Stack: Node.js, Express.js, MongoDB)

- Developed **gameplay logic** for public/private tables and real-time friend matches.
- Implemented **authentication via Facebook, Google, and guest login** for seamless access.
- Designed and optimized **APIs for in-app purchases** of coins and sticks with secure handling.
- Built **scalable MongoDB schemas** to manage users, sessions, and virtual assets.
